

AXIS Optimizer for Milestone XProtect®

Unlocks great Axis features and user experiences

AXIS Optimizer for Milestone XProtect® is a plugin handler that makes all current plugins for Axis devices available to XProtect in one place. It offers maximum value to end users and system integrators by delivering all needed plugins for optimally running Axis devices within XProtect.

AXIS Optimizer for Milestone XProtect is available as a free download from:
http://ftp.axis.com/pub_soft/AXIS_Optimizer/

Some Axis devices are equipped with features that require additional plugins to run optimally in XProtect. Traditionally, this requires system integrators or XProtect end users to manually manage the discovery, installation and configuration process for a range of Axis plugins related to Axis devices on their network. This process consumes considerable time and effort to manage regardless to whether a network contains thousands, hundreds or even just a few devices.

AXIS Optimizer for Milestone XProtect provides one time installation for all relevant, required plugins for Axis devices on your network. It unlocks all the features and capabilities in both Axis device and XProtect, bringing value to system integrators, administrators and operators.

Why use AXIS Optimizer for Milestone Protect

- > Enjoy optimal experience running Axis devices on XProtect – be ensure Axis devices will function optimally within XProtect
- > Streamline plugin discovery, installation and configuration process: save considerable time and efforts required to manually search for, download, install and configure all Axis plugins for your devices
- > Simplest way to gain direct, easy access to the latest Axis plugin versions for XProtect

Plugins included

The following plugins and integrations are included:

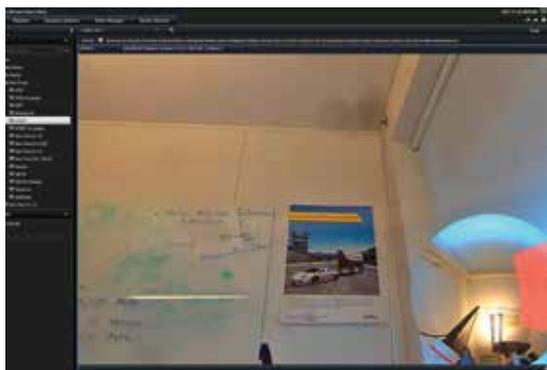

- > **Dewarping:** smooth 360° dewarping of client-side live and recorded video ensures view using Axis cameras
- > **Radar:** helps configure and manage your Axis radars, exclusion zones, etc.
- > **On Screen controls:** manages access to camera-specific features in Axis devices
- > **Speed Dry:** remove water and condensation from Axis PTZ cameras to ensure sharp images in rainy weather conditions
- > **Wiper:** remove excess water and rain from the lens of an Axis positioning camera
