Software version 1.15 for the AXIS 700 Network Document Server

1.15 is an upgrade to the AXIS 700 Network Document Server embedded software and replaces 1.14. All previously delivered units can be upgraded with the new software, which is available free of charge. All features of the previous releases are retained. There is no need to upgrade to 1.15 unless you are affected by any of the corrected problems. Please refer to the release notes for more information.
